EDUCATION

W. P. Carey School of Business at Arizona State University Aug 2025 – Sept 2026
Master's in Artificial Intelligence in Business
Tempe, Arizona

- **Relevant Coursework:** AI in Business, Enterprise Data Analytics,

Machine Learning in Business, Business Process and Systems, AI and Data Analytics Strategy,
Analytics for Unstructured Data, AI Business Strategy,
Programming for AI and Data Analytics in Business, Transforming Business with AI (Capstone).

Pandit Deendayal Energy University July 2021 – May 2025
Bachelor of Business Administration (BBA), Finance. Gandhinagar, Gujarat

- **Relevant Coursework:**
  Finance Major Coursework: Financial Management, Corporate Finance, Investment Analysis and Portfolio Management, Accounting for Managers, Business Administration.

PROFESSIONAL EXPERIENCE

Intern Dec 2023 – Mar 2024
CEE, CATCH FOUNDATION Ahmedabad, Gujarat

- Assisted in delivering basic environmental education to school children, including helping them learn alphabets,
- draw nature-themed pictures, and engage with foundational environmental concepts through creative activities.
- Supported program staff in managing classroom sessions and interactive learning modules, ensuring smooth
- coordination and active student participation.
- Collaborated with team members to improve internal operations and provided suggestions on outreach strategies
- to connect with more schools and communities in need of support.
- Contributed to the planning and delivery of grassroots awareness sessions aligned with CEE's focus areas such as waste management, biodiversity, and sustainable living.
- Gained practical experience in community-based education, environmental outreach, and working within a
- mission-driven, impact-oriented organization.

Fellowship Program Nov 2025 – Jan 2026
Diamond Mind AI Tempe, Arizona

- Selected as a Research Fellow to evaluate, test, and provide strategic feedback on AI-driven workflow automation systems.
- Collaborated with internal teams to assess performance, usability, and scalability of AI tools designed to optimize operational processes.
- Conducted systematic testing and evaluation of AI workflow automation frameworks.
- Analyzed model outputs, automation logic, and system performance across diverse use cases.
- Identified inefficiencies, edge cases, and optimization opportunities within AI pipelines.
- Delivered structured, insight-driven feedback to improve product reliability and user experience.
- Contributed research-backed recommendations to enhance automation accuracy and scalability.
- Documented findings in detailed reports and presented actionable insights to the development team.

PROJECT EXPERIENCE

Research Paper May 2024 – May 2025

- **Authored an independent research paper** on "The Impact of Mobile Banking Applications on Customer Engagement and Satisfaction," showcasing end-to-end ownership of the research process.
- **Designed and conducted primary research** by developing structured surveys, collecting customer responses, and applying statistical techniques to analyze behavioral patterns.
- **Evaluated key factors** such as usability, security, and personalization in shaping customer trust, satisfaction, and long-term loyalty.
- **Reviewed and synthesized academic and industry literature** to establish context and support findings with existing research trends in fintech and digital banking.
- **Identified actionable insights** for banks and financial institutions on enhancing customer experiences through improved mobile app features.
- **Strengthened research and communication skills** by presenting findings in a clear, professional paper format.

Electronic Arts Product Management Job Simulation on Forage November 2025

- Completed a job simulation where I developed a solid understanding of different KPIs, and selected the most appropriate KPIs for the measuring and assessing specific business problems related to strategy RPG mobile game.
- Demonstrated my knowledge of key performance indicators within the video game industry.
- Broke down tasks for creating a data-driven video game presentation.

Clinical Machine Learning for Heart Disease Prediction December 2025
Supervised ML Risk Stratification Model

- Developed an end-to-end supervised machine learning model to predict heart disease using 918 patient records and 12 clinical features.
- Identified and corrected critical data quality issues (173 physiologically impossible zero values), implemented median imputation, feature standardization, and one-hot encoding using a ColumnTransformer pipeline.
- Evaluated 6 classification algorithms (Logistic Regression, KNN, SVM, Decision Tree, Random Forest, AdaBoost) and selected Support Vector Machine (SVM) based on superior ROC-AUC performance.
- Tuned hyperparameters using GridSearchCV with stratified 5-fold cross-validation, optimizing for ROC-AUC to ensure robust clinical risk ranking.
- Achieved **0.9376 ROC-AUC**, **88% accuracy**, and **91% recall**, correctly identifying 93 out of 102 diseased patients with only 9% false negatives.
- Applied PCA and clustering techniques for patient segmentation to support contextual clinical decision-making.
- Designed deployment strategy including REST API integration with EHR systems and continuous monitoring framework to mitigate model drift and regulatory risks.

Datacom Partnering with AI in the workplace Job Simulation on Forage February 2026

- Partnered with generative AI tools (e.g., ChatGPT) to research, write, design, and debug in fast-paced project environments
- Created client-ready reports and presentations by prompting AI for feature ideas, technical examples, and visual storytelling guidance
- Diagnosed and resolved a website issue by guiding AI through troubleshooting and testing, demonstrating initiative and self-learning in a non-technical role
- Used AI tools to improve productivity, clarify project needs, and deliver solutions faster, including feature planning, UI ideas, and clean code examples

SKILLS & ACTIVITIES

- **Languages:** English (Advanced), Gujarati (Advanced), Hindi (Advanced).
- **Computer Skills:** Microsoft Office Suite (Word, Excel, PowerPoint, Outlook), Google Workspace (Docs, Sheets, Slide, Drive), Canva (Pro) for design and presentations, Jupyter Notebook and Google colab for coding analysis, Tableau, Streamlit for

building dashboards, VS code and PyCharm (IDE Familiarity), Zoom, Slack, Microsoft Teams.

- **Technical Skills:** Programming and developing (Python, R), Data and Databases (SQL, MySQL Workbench, Database design, ER diagrams), AI and Machine Learning (AI driven Business Decision-Making, AI Integration in Applications, AI Strategy and Implementation Planning), Data Analytics (Data Modeling, Statistical Analysis, Regression, Forecasting), Ethical AI Practices (Transparency, Governance, Responsible AI use), Problem Solving (Analytical Thinking, Strategic Decision-Making), Software Development (Web Development with AI Integration, Application Prototyping).

Core AI & Business Skills

- Understanding of AI model architectures, capabilities, and limitations (bias, hallucinations, transparency)
- Proficiency in **Prompt Engineering** using few-shot, zero-shot, and persona-based prompting
- Familiarity with **Python** for automating prompt testing and interacting with AI APIs
- Skilled in interpreting and analyzing AI outputs to refine accuracy and user alignment
- Experienced in using **OpenAI, Lovable, Cursor, Base 44, and Hugging Face APIs** for prototype development
